

SEPA ENVIRONMENTAL CHECKLIST

200 NE Moe Street | Poulsbo, Washington 98370 (360) 394-9748 | fax (360) 697-8269 www.cityofpoulsbo.com | plan&econ@cityofpoulsbo.com

A. BACKGROUND						
Name of proposed project, if applicable Class IV Forest Practices in accordance	Date Prepared: August 13, 2019					
Name of Applicant: City of Poulsbo	Address: 200 NE Moe Street Poulsbo, Washington 98370	Phone Number: (360) 394-9748				
Contact: Nikole Coleman, Associate Planner	Agency Requesting Checklist: City of Poulsbo	Cression and According to the Control of the Contro				

Proposed timing or schedule (including phasing, if applicable)

N/A

Do you have any plans for future additions, expansions, or further activity related to or connected with this proposal? If yes, explain.

None.

List any environmental information you know about that has been prepared, directly related to this proposal.

None. The City of Poulsbo has adopted critical area and development regulations in compliance with RCW 36.70A. 130 and RCW 36.70A.215

Do you know whether applications are pending for governmental approvals or other proposals directly affecting the property covered by your proposal? If yes, explain.

None.

List any government approvals or permits that will be needed for your proposal, if known.

Transfer of Jurisdiction by Department of Natural Resources. Review by Department of Ecology.

Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page.

The City of Poulsbo has adopted critical area and development regulations in compliance with RCW 36.70A. 130 and RCW 36.70A.215 and therefore, in accordance with RCW 76.09.240(1)(b) will assume sole regulatory authority from the Washing State Department Natural Resources over Class IV-General forest practices within its City limits. This includes all Class-IV General forest practices activities involving the conversion of forest land to a non-forest use.

Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

Poulsbo is located in Township 26 North, Range 1 East, Willamette Meridian and is located in all or portions of Sections 9, 10, 11, 13, 14, 15, 22, 23, 24, 25, and 26.

В. Е	NVIRONMENTAL ELEMENTS	Agree	Disagree	Mitigate
1. E	arth			
a.	General description of the site (check one): flat rolling hilly steep slopes mountainous other. Poulsbo's topography varies throughout the city, from flat to areas of steep slopes. Actual development will be subject to additional SEPA review as appropriate. Environmental review and a threshold determination will be required at the time of development review. Site specific development impacts are not identified at this time.	/		
b.	What is the steepest slope on the site (approximate percent slope)? There are areas within the city limits with slopes exceeding 40 percent, and potential geohazard areas are mapped on the City's critical areas maps. At the time of a development proposal, additional information on slopes will be required. Future development will require additional environmental review.	*/		
c.	What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils According to the Kitsap County Soil Survey, the soils within the city limits is predominately classified as Poulsbo Gravelly sandy loam, with areas of Kapowsin gravelly loam and Sinclair soils.	√		
d.	Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe. Geohazards are mapped in the City's critical areas maps and unstable soils/slopes are regulated by the City's Critical Areas Ordinance. No	/		
	development is proposed at this time. Review of soil conditions will occur at the time specific proposals move forward.	\checkmark		
e.	Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill. This is not applicable to this non-project action.	\checkmark		
f.	Could erosion occur as a result of clearing, construction or use? If so, generally describe. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. Erosion control would be addressed through existing City ordinances, including the Tree Cutting and Clearing Ordinance, Grading Ordinance, and Critical Areas Ordinance.	<i></i>		
g.	About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)? This is not applicable to this non-project action. No development is proposed at this time. Projects will require further analysis and SEPA review, where appropriate.	$\sqrt{}$		

h.		oosed measures to reduce or control erosion, or other impacts to the h, if any.			į.
	ador stan requ eval	e. No development is proposed at this time. However, Poulsbo has an oted Critical Areas Ordinance as well as adopted storm water management dards/guidelines. Development in the City is subject to these direments. In addition, non-exempt development proposals will be uated on a case-by-case basis under SEPA for erosion impacts with gation imposed as determined necessary.	V		#
2. Ai	7				
a.	auto proje	t types of emissions to the air would result from the proposal (i.e. dust, mobile, odors, industrial, wood smoke) during construction and when the ect is completed? If any, generally describe and give approximate ntities if known.			
		levelopment is proposed at this time. Determination will be made at the specific proposals move forward.			
b.		there any off-site sources of emissions or odor that may affect your osal? If so, generally describe.		1	
		levelopment is proposed at this time. Determination will be made at the specific proposals move forward.	/		
C.	Prop any.	osed measures to reduce or control emissions or other impacts to air, if			
	at th the Depa	e. No development is proposed at this time. Determination will be made e time specific proposals move forward. New construction will comply with requirements of the Poulsbo Municipal Code and the Engineering artment, which will be reviewed at the time of a specific project proposaling forward.	/		
3. Wa	ater				
a.	Surfa	ace:			
	1)	Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.	ett edakele Tanud Tanud		
		Poulsbo's main surface water body is Liberty Bay; there are numerous streams and wetlands throughout the city limits. There is no development proposed at this time; future development will require additional environmental review.	/		
	2)	Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.			
		No development is proposed at this time. Determination will be made at the time specific proposals move forward. Poulsbo does have shoreline along Liberty Bay.	/		
otheric - D	3)	Estimate the amount of fill and dredge that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.			
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward.			

	4)	Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities, if known.			
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward.	/		
	5)	Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.			
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward. Portions of the city doe lie within the 100-year floodplain.	√		
	6)	Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.			
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward.	✓		
b.	Grou	ınd:			
	1)	Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.	/		
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward.	√		
	2)	Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals; agricultural; etc). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.	/		
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward.	√		
C.	Wate	er Runoff (including storm water):			
	1)	Describe the source of runoff (including storm water) and method of collection and disposal, if any (including quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.			
		This is not applicable to this non-project action. No development is proposed at this time. Future development will be reviewed and required to meet City and State regulations for stormwater management. Determination will be made at the time specific proposals move forward.	/		
	2)	Could waste materials enter ground or surface waters? If so, generally describe.			
		This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward.	$\sqrt{}$		
				1	

d.	 Does the proposal alter or otherwise affect drainage patterns near the site? If so, describe. This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward. Proposed measures to reduce or control surface, ground, and runoff water 	V		
	impacts, if any: This is not applicable to this non-project action. No development is proposed at this time. At the time of development review, projects will be reviewed for compliance with the City's adopted storm water management regulations and updated critical areas ordinance.	/		
4. P	lants	ation in the second of the	en de la companyación de la comp	
a.	Check types of vegetation found on the site: Deciduous tree: alder, maple, aspen, other Evergreen tree: fir, cedar, pine, other Shrubs Grass Pasture Crop or grain Wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other Water plants: water lily, eelgrass, milfoil, other Other types of vegetation The checked vegetation is found throughout Poulsbo. This is not applicable to this non-project action. No development is proposed at this time. The existing vegetation for sites will be determined at the time of development review.			
b.	What kind and amount of vegetation will be removed or altered? A Class IV application involves the removal of timber in Poulsbo. It is anticipated that numerous large trees will be removed, such as Douglas Fir, Hemlock, such as Western Red Cedar.	1		
C.	List threatened or endangered species known to be on or near the site. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	√		
d.	Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. Poulsbo also has significant tree regulations that seek to retain vegetation and trees.	✓	procession approve the FARM	
e.	List all noxious weeds and invasive species known to be on or near the site. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. However, common noxious weeds in the Puget Sound region include Scotch broom, Himalayan blackberry, English Ivy, common tansy, and evergreen blackberry.	✓		
5. Ar	nimals			
a.	Check any birds and animals which have been observed on or near the site or are known to be on or near the site: Birds: hawk, heron, eagle, songbirds, other: Mammals: deer, bear, elk, beaver, other: Fish: bass, salmon, trout, herring, shellfish, other: There are a variety of birds, fish, and mammals that inhabit Poulsbo. They are primarily located near streams and Liberty Bay.	✓		

b.	List any threatened or endangered species known to be on or near the site.		
	Poulsbo has several listed species, including bald eagle, blue heron, harbor seal, salmon (Chinook, chum, coho), steelhead, cutthroat, hardshell clam, smelt, and sand lance.		
	No development is proposed at this time. Additional environmental review will be conducted at the time of application for specific development.	\checkmark	
C.	Is the site part of a migration route? If so, explain.		
	Liberty Bay and adjacent streams are known to contain anadromous salmonids. The City is located within the Pacific Flyway – a flight corridor for migrating waterfowl and other birds – that extends from Alaska to Mexico and South America.	J	
d.	Proposed measures to preserve or enhance wildlife, if any. This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward. The City's Critical Areas Ordinance provides protection for wildlife. Any additional mitigation necessary will be identified at the time of site-specific development review. Poulsbo also has significant tree regulations that seek to retain vegetation and trees to promote the retention of wildlife habitat.	\checkmark	
e.	List any invasive animal species known to be on or near the site. This is not applicable to this non-project action. No development is proposed at this time. Determination will be made at the time specific proposals move forward. The City's Critical Areas Ordinance provides protection for wildlife. Any additional mitigation necessary will be identified at the time of site-specific development review.	\checkmark	
6. En	ergy and Natural Resources		
6. En	what kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.		
	What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be	√	
	What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. Future development will meet the current energy code as identified in the International Building Code.	\frac{1}{\int_{\text{\chi}}}	

	1)	Describe any known or possible contamination at the site from present or			
		past uses. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	/		
	2)	Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.	/		1
		This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	i insi wa Kirangan		
	3)	Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.	✓	all Se	
		This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.			3 · · · · · · · · · · · · · · · · · · ·
	4)	Describe special emergency services that might be required.			
,		This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	/		
	5)	Proposed measures to reduce or control environmental health hazards, if any.			1
		This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	✓		
b.	Noise	e di managan gamatian kumatan kantan angara da ya ka		3.X 5.3	
	1)	What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?			
ang a are made d		The city has a typical level of noise expected in an urban environment.	·		-1
	2)	What types of levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.	/		
		This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.			
	3)	Proposed measures to reduce or control noise impacts, if any. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. Generally, though, proposals will be evaluated on a case-by-case basis for noise impacts. Possible mitigation through that process may, for example, Include limting hours of construction and/or operation or placement of landscape buffers or noise attenuating walls.	1		
8. La		Shoreline Use			
a.	The common industrial	t is the current use of the site and adjacent properties? Will the proposal to current land uses on nearby or adjacent properties? If so, describe. City has a variety of single-family residential development along with mercial areas, and other uses including multifamily residential, light strial, institutional, and parks. Public facilities such as schools, roads, and are present. Churches, cemeteries and vacant land are amongst other uses.	J		

b.	Has the project site been used as working farmlands or working forest lands? If		
	so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?	V	
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.		
	Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:	/	
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.		
C.	Describe any structures on the site. No development is proposed at this time. Determination will be made at the time specific proposals move forward. City-wide, Poulsbo has structures common to urban development including, but not limited to: residential structures, commercial office and retail buildings, and light industrial buildings, signs, schools, and churches.	J	
d.	Will any structures be demolished? If so, what?	/	
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	<i></i>	
e.	What is the current zoning classification of the site?		
-	The Zoning Ordinance Map includes Residential Low, Residential Medium, Residential High, C-1 Commercial/Downtown, C-2 Commercial/Viking, C-3 Commercial/SR 305, C-4 Commercial/College Marketplace, Business and Employment, Office Commercial Industrial, Light Industrial, and Park.	/	
f.	What is the current comprehensive plan designation of the site?		
	The Land Use Map includes Residential Low, Residential Medium, Residential High, Commercial, Light Industrial, Office Commercial Industrial, Business Park, and Park.	1	
g.	If applicable, what is the current shoreline master program designation of the site?		
	No development is proposed at the comprehensive plan amendment stage. Determination of shoreline designation and applicable review requirements will be made at the time specific proposals move forward. Shoreline Designations include Shoreline Residential 1, Shoreline Residential 2, Urban Conservancy, Natural, Aquatic, and High Intensity.	J	
h.	Has any part of the site been classified as a critical area by the city or county? If so, specify		
	The actual development of the specific sites will be subject to additional development review and would be subject to environmental review. Site specific development impacts are not identified at this time. Identification of critical areas will be made based on the City's Critical Area Ordinances maps and site-specific environmental information prepared during the development review process.	J	
i.	Approximately how many people would reside or work in the completed project?		
	The 2019 Office of Financial Management population estimate for Poulsbo was 11,180.	$\sqrt{}$	

j.	Approximately how many people would the completed project displace?		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	/	
k.	Proposed measures to avoid or reduce displacement impacts, if any. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. The Comprehensive Plan's Housing Element seeks to provide a range of affordable housing opportunities for all economic segments of the population.	√	
l.	Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any. No development is proposed with the comprehensive plan amendments. Determination of specific measures to ensure compatibility will be made during development review. The City's zoning and critical area regulations include provisions to ensure compatibility between existing and proposed land uses and for the protection of natural resources. These provisions regulate the removal or trees and in some cases on critical lands may prohibit forest practices.	√	
m.	Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any.		
	No development is proposed with the comprehensive plan amendments. Determination of specific measures to ensure compatibility will be made during development review.	\checkmark	
9. H	pusing		
a.	Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.	✓	
	None. This is a non-project action.		
b.	Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.	✓	
	None. This is a non-project action.		
c.	Proposed measures to reduce or control housing impacts, if any.	7	
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	J	
10. /	Aesthetics		
a.	What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. The height limit within any zone in Poulsbo is 35 feet. In some zones, if underground parking is provided, and additional 10 feet of height is allowed.	/	
b.	What views in the immediate vicinity would be altered or obstructed?		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	✓	
C.	Proposed measures to reduce or control aesthetic impacts, if any.		a comment sin
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. While site specific development impacts are not identified at this time, building height and design review requirements are set forth in Poulsbo's zoning ordinance.	J	

	Light and Glare	Γ		
a.	What type of light or glare will the proposal produce? What time of day would it mainly occur? This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. However, there are numerous sources of light and glare in the City including residential, commercial industrial and public facility uses (including streetlights).	✓		
b.	Could light or glare from the finished project be a safety hazard or interfere with views?	,		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.			
C.	What existing off-site sources of light or glare may affect your proposal?	/		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	J		
d.	Proposed measures to reduce or control light and glare impacts, if any.			
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. While site specific impacts are not identified at this time, the City's zoning ordinance contains lighting requirements. Additional environmental review will be required as sites are proposed for development.	√		:
12.	Recreation			
a.	What designated and informal recreational opportunities are in the immediate vicinity?			
	Poulsbo has a variety of public parks and recreation opportunities.	V		
b.	Would the proposed project displace any existing recreational uses? If so, describe.	(-	
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	√		
C.	Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any. This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. The Comprehensive Plan's Capital Facilities Element includes plans for increasing and improving park and recreation facilities to accommodate the existing and growing population.	J		
13. I	Historic and Cultural Preservation			
a.	Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.			
	Unknown at this time. This is a non-project action. Determination will be made at the time of specific proposals for development.	V		w 1
b.	Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.	J		
	Unknown at this time.			

С	Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc	✓		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.			
d.	Proposed measures to reduce or control impacts, if any.			
,	If at the time of site-specific development, evidence of historic or cultural resources are found, proper protocols and notifications will be initiated.	\checkmark		
14.	Transportation			
a.	Identify public streets and highways serving the site and describe proposed access to the existing street system. Show on site plans, if any.			
	Major streets and highways in Poulsbo include Highway 3, 305, SR 307, Viking Avenue, Finn Hill, Front Street, Fjord Drive, Hostmark, Caldart, and Lincoln.			l I R
b.	Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?	✓		
	Kitsap Transit provides public transit throughout the city.	0.2361170		. 0
C.	How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?		mata (I) pinepi	
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.		in the state of th	
d.	Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private). This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. The Comprehensive Plan's Capital Facilities and Transportation Elements include plans for constructing new and improving existing public transportation facilities to accommodate the existing and growing population.	/		
e.	Will the project use (or occur in the immediate vicinity of) water, rail or air transportation? If so, generally describe.	/		
	No.	ad d prigodi		
f.	How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?	$\sqrt{}$		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.			
g.	Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.			
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. The Comprehensive Plan's Capital Facilities and Transportation Elements include goals, policies and plans for constructing new and improving existing public transportation facilities to accommodate the existing and growing population, and includes goals and polices requiring transportation concurrency to ensure that transportation infrastructure is provided prior to or concurrent with growth.	√		

h.	Proposed measures to reduce or control transportation impacts, if any.			
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward. At the time of development review, projects will be reviewed for traffic impacts and appropriate mitigation will be imposed.			
15. P	ublic Services			
a.	Would the project result in an increased need for public service (for example fire protection, police protection, health care, schools, other)? If so, generally describe.	J		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.			
b.	Proposed measures to reduce or control direct impacts on public services, if any.	/		
	This is not applicable to this non-project action. Determination will be made at the time specific proposals move forward.	~		
16. Ut	ilities			
a.	Check the utilities currently available at the site:			
	electric natural gas water refuse service telephone, sanitary sewer septic system other. Utilities are also available throughout the city, with natural gas only available in specific areas. Specific determination of utility services will be made at the time of development review.	J		
b.	Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. Utilities are also available throughout the city, with natural gas only available in specific areas. Specific determination of utility services will be made at the time of development review.	J

D. SUPPLEMENTAL SHEET FOR NON-PROJECT ACTIONS

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment. When answering these questions, be aware of the extent of the proposal, or the types of activities likely to result from the proposal, that would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substance; or production of noise?

It should not. The purpose of the Tree Cutting and Clearing ordinance includes the regulation of cutting of trees in order to help preserve the wooded character of the City of Poulsbo and to protect its urban forest., protecting and preserving the public interest by regulating land alteration, enhancing the City's physical aesthetic character by managing the removal of vegetation, trees and ground cover, and recognizing there will be circumstances, such as land development, disease or danger of falling, that may require the removal of trees and ground cover.

All development and uses will be subject to all applicable local, state and federal regulatory requirements and will be reviewed on a case-by-case basis during the development review process.

Proposed measures to avoid or reduce such increases are:

The Comprehensive Plan's goals and policies direct the City to promulgate development regulations that protect, preserve and enhance the natural environment and limit impacts from the built environment. For example, the City's storm water management, critical area and shoreline regulations, and grading ordinance are designed to avoid or reduce adverse environmental impacts.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The Comprehensive Plan establishes goals and polices aimed at protecting fish and wildlife habitat and preserving vegetation including trees to reduce runoff and erosion, improve air quality and maintain the City's character. The trees maintained in the City will improve and maintain habitat for fish, wildlife and plants.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

In accordance with Comprehensive Plan goals and polices, the City has an adopted critical areas ordinance which offers protection for stream corridors, wetlands, and other areas where fish and animals may have habitat by controlling uses, setbacks, and buffers. The City also has a tree retention ordinance as well as a landscaping ordinance that helps preserve or replace trees to provide habitat for animals. The City's Shoreline Master Program also offers some control over development of the shoreline areas to protect habitat and vegetation. Individual development proposals undergo SEPA review.

3. How would the proposal be likely to deplete energy or natural resources?

Proposal is not expected to deplete energy or natural resources. Projects resulting from the amendments will require further environmental review at the time of development application.

Proposed measures to protect or conserve energy and natural resources are:

Measures would be identified during the project specific development permit and environmental review. Compliance with city regulations and other appropriate mitigations would provide the appropriate measures to reduce impacts.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

The proposed transfer is likely to have a positive effect on critical areas, protected species and places. The City does not have any prime farmlands.

	Proposed measures to protect such resources or to avoid or reduce impacts are:
	The City has an adopted critical area and shoreline regulations which offer protection for stream corridors. wetlands, and other fish and animal habitats (including endangered species).
5.	How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?
	The proposed transfer will not change existing land use patterns.
	Proposed measures to avoid or reduce shoreline and land use impacts are:
	A purpose of the existing Comprehensive Plan and development regulations is to ensure uses are compatible with surrounding uses, the physical environment and existing plans. The Comprehensive Plan includes shoreline policies directing only appropriate development in selected shoreline areas while protecting other areas with conservancy designations.
6.	How would the proposal be likely to increase demands on transportation or public services and utilities?
	The proposed transfer will not increase demands on transportation or public services or utilities. However, future developments on the subject sites may have increased demands, which would be identified during the specific project development review. Projects resulting from amendments may require further review under SEPA which will be accomplished as required under WAC 197-11 and the Poulsbo Municipal Code.
	Proposed measures to reduce or respond to such demand(s) are:
	Measures to reduce impacts on transportation, public services and utilities would be identified during project specific development review. Compliance with city regulations and other appropriate mitigations could provide the appropriate measures to reduce impacts.
7.	Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.
	The proposed amendments do not conflict with any local, state or federal laws or requirements for the protection of the environment. All future development proposals would be required to follow all applicable

regulations regarding the protection of the environment.
